InfoValue Announces Delivery of TV Switcher Feature

Enables easy, flexible and precise control of IPTV endpoints

ELMSFORD, N.Y. – Feb. 15, 2017 – InfoValue Computing, Inc. (“InfoValue”), IP Media Experts, today announced the delivery of the IPTV Switcher (“Switcher”) feature with its IPTV platform. Switcher simplifies remote control of IPTV endpoints (e.g., smart TVs, set-top boxes), from TVs in hallways, video-walls in lobbies, to arrays of TVs in production rooms. It is also compatible with smartphones, tablets, touch panels and PC monitors.

Switcher displays all IPTV end points and available channels in every location. Tuning a TV to a channel is as simple as selecting the TV, picking the channel and then clicking the tune button. Multiple TVs can be tuned to the same channel at the same time by creating a TV Group.

Switcher can also instantly tune multiple TVs to different channels using the unique Profile feature, which maps TVs to channels, such as TV1 to CH10, TV2 to CH20, etc. To tune the TV’s to a specific Profile, all the user needs to do is select the desired Profile and click on the tune button.

“Switcher exemplifies the power of InfoValue’s IPTV platform in extending advanced, yet easy-to-use features,” said Dr. Monsong Chen, president and CEO of InfoValue. “We think customers will be excited to use Switcher, which immediately simplifies and expands their IPTV operations.”

InfoValue’s IPTV Switcher feature is available now from InfoValue at 914-345-5980

(www.infovalue.com) or InfoValue resellers.
