

infovalue[®] Wedding Photos Module

Share the joy, happiness, and precious moments with newlyweds, friends, and family in real time.

A wedding is a joyous, and momentous event, not just for the newlyweds, but also for the family and friends who have gathered to celebrate with them. The photos from a wedding forever immortalize the excitement, and importance of the occasion. The InfoValue SuiteTV Wedding Photos Module (“Wedding Photos”) gives hotels the ability to help celebrate the event, by sharing these photos with all wedding guests in real time.

Arranging and using Wedding Photos is very simple. Once the hotel is informed that the soon-to-be-newlyweds would like to utilize the feature, the hotel staff will prepare an event-specific Wedding Photos PIN. The PIN number will be given to guests at check-in, if their reservation is associated with the wedding.

Wedding Photos has a built-in photo management system that allows the newlyweds, the wedding planner, the photographer(s) and/or hotel staff to easily upload pictures and share them with family and friends in real-time throughout the wedding celebration. Wedding Photos also works with existing third-party photo systems.

Family and friends can view Wedding Photos in their own guestrooms by selecting “Wedding Photos” from the SuiteTV Interface and entering the PIN number. They can view the wedding photos in gallery form or enlarge photos to full screen. If the newlyweds, hotel, or photographer(s) desire, a watermark can be added to the full screen photos. All the photos have a unique identifier, so guests can request to have specific photos printed.

InfoValue SuiteTV Wedding Photos Module is a feature that will enhance the overall guest experience, increase customer satisfaction and loyalty, and it also presents possible new revenue sources.
