InfoValue Announces Delivery of IPTV on Fire TV

Enables simple, flexible and precise interactivity of IPTV endpoints.

ELMSFORD, N.Y. – Dec. 6, 2017 – InfoValue Computing, Inc. (“InfoValue”), IP Media Experts, today announced the delivery of “IPTV on Fire TV”, an extension of the InfoValue IPTV platform to Amazon Fire TV devices for combining consumer OTT Apps and commercial service offerings.

With IPTV on Fire TV, users have all the premium features of the InfoValue IPTV platform, such as personalized multimedia information portals, TV channels with time-shifting, VOD, managed promotions, etc., and simultaneously endless consumer OTT Apps on Fire TV devices.

IPTV on Fire TV makes Fire TV devices compelling alternatives to commercial-grade smart TVs or IP Set-Top Boxes in many IPTV and Digital Signage deployments, such as residences, student housing, assisted living communities, public space TVs, etc. Utilizing a consumer-based device for mixed-use commercial and consumer applications provides a flexible and cost-efficient approach to campus IPTV environments.

“IPTV on Fire TV is a tremendous extension in bridging commercial and residential IPTV deployments,” said Dr. Monsong Chen, president and CEO of InfoValue. “System integrators, service providers, and end users can all benefit from the resulting value propositions.”

InfoValue’s IPTV on Fire TV is available now from InfoValue at 914-345-5980 (www.infovalue.com) or InfoValue resellers.
