

# InfoValue HealthcareTV™

Delivers High Definition patient education and entertainment healthcare service portals

*InfoValue HealthcareTV™ is a turnkey IPTV solution that delivers High Definition TV programming, internal channels, and VOD services to hospital patients. HealthcareTV allows hospital administrators to present a High Definition, fully customized, and attractive service portal to effectively interact with the patients while assisting doctors and nurses in educating patients with healthcare educational videos.*

HealthcareTV delivers educational videos via intuitive TV interfaces to promote patient's self education. HealthcareTV also entertains patients with High Definition TV programming and videos from a broad selection of on-demand feature-length movies, concerts, and independent films. Patients and their families will enjoy digital entertainment with perfect picture quality and fully interactive controls, including fast forward, rewind, pause, and bookmarking. HealthcareTV is compatible with pillow speakers and fully supports hospital administration system integrations.

Additionally, communication between hospital staff and patients can be enhanced with integrated Digital Signage and mobile device support.

HealthcareTV represents the latest advances in hospital patient education and entertainment, simultaneously increasing patients' well-being and satisfaction. HealthcareTV works seamlessly with the industry leading InfoValue IPTV platform to ensure 24x7 reliability, comprehensive manageability, and unlimited scalability and extensibility for future expansions.
