

InfoValue SuiteTV™

Delivers High Definition entertainment and guest-centric hotel service portals

InfoValue SuiteTV™ is a turnkey IPTV solution that empowers hoteliers to deliver High Definition TV programming, barker channels, and VOD services to their guests. SuiteTV also enables hoteliers to establish customized, attractive high resolution hotel service portals to effectively interact with their guests to service all their needs while increasing the hotel's revenue and branding.

SuiteTV delivers digital TV programming with an Interactive Program Guide (IPG), and enables Time-Shift TV (TSTV) channels and Network Personal Video Recording (nPVR) to increase personalized time-shift viewing flexibility. SuiteTV allows guests to watch VOD from a broad selection of first-run Hollywood movies, independent films and alternative content at their convenience. Guests can enjoy live TV and VOD content from their in-room TV or from their mobile device anywhere on property.

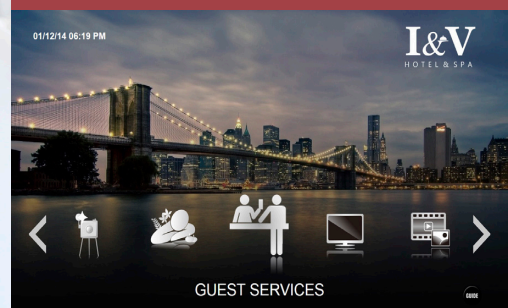

SuiteTV represents the easiest, fastest leap forward in delivering compelling services that generate new revenues and increase occupancy rates while simultaneously reducing operational expenses.

SuiteTV interfaces with hotel Property Management systems (PMS) and guest relations management systems to interactively provide personalized information and services to guests. SuiteTV has integrated Digital Signage and mobile device support to assist hoteliers to effectively communicate with their guests. Guests can now view their personal device media content on the in-room TV via utilizing casting features and OTT applications. In addition to increasing guest loyalty, hoteliers can directly deliver targeted marketing, ads, and promotions.

SuiteTV works seamlessly with the industry leading InfoValue IPTV platform to ensure 24x7 reliability, comprehensive manageability, and unlimited scalability and extensibility for future expansions.

- Hotel Service Portal
