InfoValue releases InfoValue IPTV Tab for Dual Screen IPTV Experiences

Unify guest TV and mobile experiences and extend staff communication

June 8, 2018. —**InfoValue Computing, Inc.** (“InfoValue”), experts in providing innovative, interactive IPTV platform and solutions, today announced the release of InfoValue IPTV Tab (“**IPTVTab**”), a tablet-based enhancement of the InfoValue IPTV platform. InfoValue views the future of the guest room technology as a fully automated and unified experience for the hotel guest. IPTVTab is one of many upcoming enhancements on InfoValue’s roadmap to this vision of the future.

IPTVTab extends all of the features and capabilities of the TV interface to the tablet, including: compendium information, VOD & IPTV channels, folio review/express checkout, etc. IPTVTab also takes advantage of InfoValue’s extensive integrations with various guest service systems, giving guests an unprecedented level of control, and access to every aspect of their stay. From IPTVTab, guests will be able to control the television, environmental settings (HVAC, lights, blinds), order room service, make restaurant reservations, place service requests, and cast streaming media to the TV.

The advantages of IPTVTab also include another, more efficient avenue of communication between the guest and the hotel staff, which will translate into a positive impact on hotel operations, as well as guest satisfaction.

“We are very excited about the InfoValue IPTVTab enhancement to our IPTV platform,” said Monsong Chen, President & CEO of InfoValue, “The capabilities of IPTVTab will

greatly enhance the in-room experience for hotel guests, while also streamlining operations and efficiency for hoteliers.”
